Solid Wood Stable Doors and frames made to your sizes and requirements, pre-hung into the frame. Choose your timber, colour and lock type.
ABOUT OUR STABLE DOORS

All our stable doors are made to measure to your sizes and requirements in our own workshop they can be made from many woods including Oak, Idigbo (hardwood which can be stained or painted), Sapele, Iroko and more. See the various stable door pages here and in our website for prices and pictures. Prices in this document are for the door and frame only arched headers and toplights are possible but chargeable.

Stable doors can be made to open inward or outward and where the two halves of the stable door meet they are rebated together and weatherstripped ensuring no water or draft gets in.

All our stable doors are supplied with two wooden weatherboards one for the middle of the door and one for the bottom, these MUST be fitted if the door is not in a porch or covered area.

Stable doors can be made with 4 panes, 6 panes or 9 panes. They can also be made with no glass, one vision panel or one large glazed top panel. All our stable doors can be made to open in or out from oak and other hardwoods such as iroko and sapele (mahogany type) for a stained finish and Idigbo for painted doors this can also be stained.
